

"Every drop of water that falls is impacted by what we do on the land!"

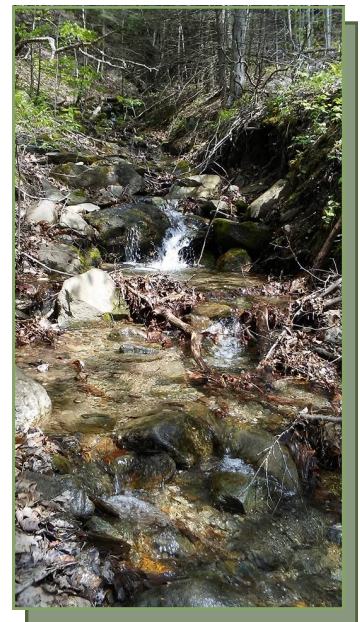

When you think of Vermont, what do you picture?

Green mountains, forests, farms and beautiful rivers.....
Or, perhaps the waters of Lake Champlain.

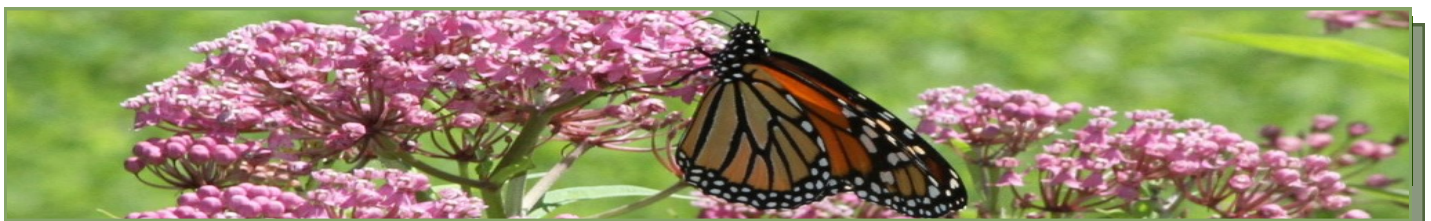

From the top of Camels Hump to the shores of Lake Champlain, every drop of water that falls is impacted by what we do on the land. Mounting threats to Water Quality including excessive nutrients, algal blooms, sodium chloride and stormwater runoff are impacting not only our water resources and aquatic species, but also the economic vitality of the region.

For the past 75+ years the Winooski Natural Resources Conservation District has worked through program initiatives, partnerships and on the ground projects to protect, restore and enhance the natural resources in and around the Winooski River Watershed and beyond. This important work would not be possible without the dedicated partnership and support of individuals such as yourself.

Partner with the WNRCD to achieve the lasting protection of our natural resources.

"Together we can make a difference."

Partner With The WNRCD

Watershed Restoration Fund

The Winooski Natural Resources Conservation District works to protect, restore, and enhance natural resources. This work is centered on agricultural assistance, forestland enhancement, urban conservation, and watershed stewardship. In each of these areas, WNRCD identifies, develops, and implements programs and projects that address pressing conservation concerns.

To identify, develop and implement projects the WNRCD relies on donations from dedicated individuals, environmentally conscious businesses, foundations, memberships and grants.

Your tax deductible donation will allow for the continuation and growth of programs focused on natural resource conservation and helping residents achieve lasting protection through project implementation on their own properties. Furthermore your assistance will help implement projects on school grounds, local parks and grow education and outreach programs to allow everyone to become better stewards of the land.

Your tax deductible donation is a great way to show support for natural resource protection and invest in local natural resource conservation issues.

**Support the conservation of Vermont's natural resources
by donating to the Watershed Restoration Fund today!**
Together, we can make a lasting difference.

Thank you for your support!
